FIG. 7 is a perspective view of the device 100 in a folded state.

Fig. 7

FIG. 8 is a perspective view of a device 100 in a first state, where the device 100 is in a folded position. The device 100 includes a first panel 110 and a second panel 120, which are connected by a hinge 130. The device 100 is shown in a perspective view, with the first panel 110 and the second panel 120 being rectangular in shape. The hinge 130 is located between the two panels, allowing them to fold together. The device 100 is shown in a perspective view, with the first panel 110 and the second panel 120 being rectangular in shape. The hinge 130 is located between the two panels, allowing them to fold together.
